

Advanced Mathematics & Mathematics Tutoring

Advanced Mathematics

PreCalculus and Trigonometry are two of the advanced mathematics classes we currently offer. These two classes are very helpful in improving our student's ACT scores as well as better preparing them for the mathematics classes they will take in college. These classes also participate in a math competition, which takes place at OSU. The math competition lets the students test their math skills, and they will get to experience two lectures from college professors.

Mathematic Tutoring

Mathematics tutoring is offered twice a week from 7:00-8:00 am Tuesday and Thursdays. This is offered to all students to help them with any type of math that they are struggling with. They can also come in during this time to get ACT help. This is a great resource for all students to help them succeed in any math course.
