

Colcord IT Opportunities

Every student at Colcord has an email account. We take advantage of google apps for education and that means that they also have unlimited space in their account to save pictures and files to google photos and google drive. Some classrooms are using Google classroom and this is exactly what our universities use. You will have the experience with this ahead of time when or if you decide to further your education. You will also learn how to sign in to our domain with their own username and password.

We have wireless throughout the district and you will have access to our internet and that will save your parents some moola!! As a senior you may have the opportunity to be my student aide and will assist in many things. In the near future , we will be installing internet access points at the football field and our baseball and softball fields and you may be involved in accomplishing this. I look toward to seeing the current Moseley Tigers become the newest Hornets!
